

XPRESSENTRY

Handheld Badge Verification

XPressEntry provides advanced security capabilities from a handheld device, especially where a fixed reader is not feasible. XPressEntry is used across many industries, including Oil & Gas, Government, Construction, Military, Manufacturing, and more.

Access Control Integrations

Benefits

IMPROVED SAFETY

Know instantly who is in your facility, where they are, and how long they've been inside.

SAVES TIME

Scanning badges with the handheld takes less time than recording information on paper.

SUPPORTS ALL BADGE TYPES

All major credential types are supported, including Prox, PIV, iClass, Barcode, Magstripe, etc.

BETTER RECORDKEEPING

Immediately report occupancy, missing users, and activity history without the errors of paper logs.
