

In an emergency, accounting for your employees is your first priority. With XPressEntry, you can account for hundreds of personnel in minutes!

Emergency Begins

Employees evacuate to their assigned areas. Evacuation leaders are ready with handheld devices.

Scan Employees

Evacuation leaders use handheld devices to quickly scan and record individuals who safely evacuated.

Identify Missing People

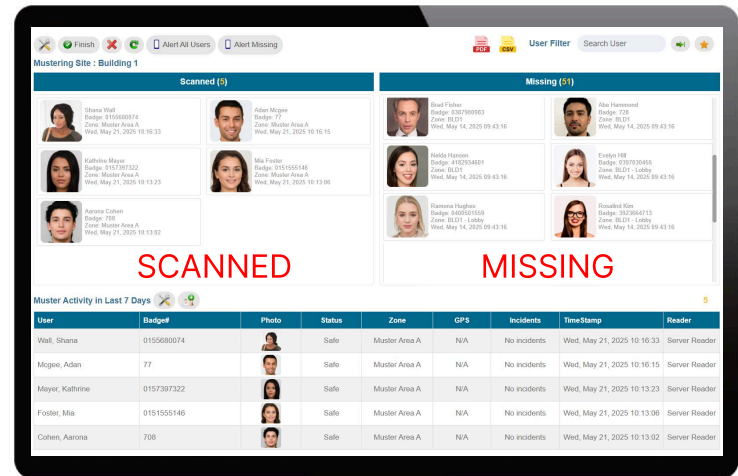

Handhelds send rosters to evacuation station for viewing. Real-time data is shared between handhelds.

Notify First Responders

First responders instantly know who has not evacuated and their last known location in the facility.

Always Ready To Go

XPressEntry works with any physical access control system and continuously monitors employee location.
