

Telaeris & Gallagher Integration Solution Brief

Security on the Move

XPressEntry is a handheld solution for Gallagher Security Command Centre access control systems.

XPressEntry handheld readers validate permissions and authenticate credentials or biometrics against the identity information on record in the Gallagher Security Command Centre access control system database from anywhere, record entries and exits where door readers are not practical or available, challenge credentials from within secured spaces, spot check permissions to deter tailgating / piggybacking, quickly muster employees during an emergency evacuation, maintain facility occupancy information, and much more.

XPressEntry handheld readers proudly lead the industry with the broadest support for badge technologies plus biometrics.

Gallagher offers comprehensive security and business risk management solutions for large and small organizations throughout the world, addressing key issues of security and risk management.

Part of the Gallagher Group, based in Hamilton, New Zealand, we design and manufacture our solutions on site. We also have regional teams located across the globe in Africa, Asia, Australia, Europe, Middle East, North and South America and the UK.

Founded in 2005, Telaeris, Inc. is a US-based software company, specializing in handheld and hands-free safety and physical security solutions to enhance access control and occupancy tracking systems. With a commitment to innovation, Telaeris collaborates with global companies to deliver effective workplace safety and security solutions, safeguarding lives and business interests. Telaeris & Gallagher Integration Solution Brief

Value Proposition

Superior security with handheld authentication to confidently control access to and manage any secured space plus ENTRY / EXIT tracking.

Ensure everyone is safely accounted for during a true emergency to improve evacuations, employee safety and OSHA / regulatory compliance.

Use existing security badges for access management to manage attendees and deny access when necessary to events and training.

Enhanced security with biometrics and multi-factor authentication to deliver enhanced identity authentication in high security areas.
