

# XPRESSENTRY

## Handheld Badge Verification

XPressEntry provides advanced security capabilities from a handheld device, especially where a fixed reader is not feasible. XPressEntry is used across many industries, including Oil & Gas, Government, Construction, Military, Manufacturing, and more.

Parking

## Access Control Integrations

## Benefits

### IMPROVED SAFETY

Know instantly who is in your facility, where they are, and how long they've been inside.

### SAVES TIME

Scanning badges with the handheld takes less time than recording information on paper.

### SUPPORTS ALL BADGE TYPES

All major credential types are supported, including Prox, PIV, iClass, Barcode, Magstripe, etc.

### BETTER RECORDKEEPING

Immediately report occupancy, missing users, and activity history without the errors of paper logs.
