

XPressEntry is the handheld solution for access control

XPressEntry readers validate permissions and authenticate credentials against the identity info on record in the access control system database on-the-go from anywhere, record entries and exits where door readers are not practical or available maintaining the latest facility occupancy info, challenge credentials within high security areas, quickly muster employees during a real emergency evacuation, and much more.

XPressEntry handheld readers proudly lead the industry with the most access control integrations and lead the industry with the broadest support for badge technologies plus biometrics.
