

Real-Time Visibility For Mission-Critical Emergency Response

XPressEntry Muster Dashboard enhances safety and security with a real-time facility occupancy visualization, empowering security professionals and emergency managers to monitor, manage, and respond to evacuations with precision and confidence. By integrating with existing access control systems and overlaying occupancy zones on facility or satellite maps, the Muster Dashboard delivers instant insights into workforce activity and XPressEntry handheld badge and biometric reader movement throughout the facility.

XPressEntry Muster Dashboard

Empowering Safety and Security Teams

Achieve Real-Time Situational Awareness

Instantly monitor worker presence and movement across facility zones with integrated facility maps.

Analyze Reader Usage Data

Gain clear visibility of access control activity and fixed or mobile reader usage across an entire facility.

Streamline Emergency Evacuations

Begin evacuations and track progress in real-time to improve response time and increase worker safety.

Visualize Reader Movement and Positioning

Monitor XPressEntry handheld badge and biometric readers with GPS.

Designed for Security Operations Centers (SOC)

Optimize daily operations and emergency management from the SOC or on-the-go with one solution.

Enhance Monitoring Without Extra Hardware

Deploy as a standalone tool to maximize the existing access control system.
