

Guard Tour Built Into XPressEntry

XPressEntry Guard Tour extends the XPressEntry platform with built-in patrol tracking, checkpoint verification, and incident reporting. Security teams can schedule patrol routes, deploy checkpoints across a facility, and verify patrol completion using the same rugged handheld readers already used for daily security operations.

Features and Benefits

GPS Tracking

Set up live patrol maps and location tracking, with map views on any device.

Patrol Management

Schedule recurring patrols and receive alerts from the XPressEntry Server.

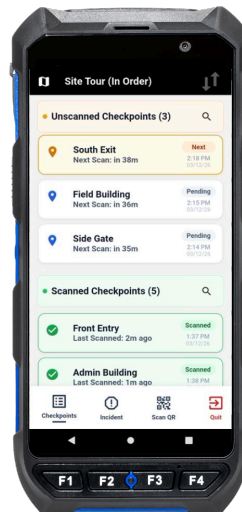

Incident Reporting

Log photos, video, and notes on the spot during any patrol.

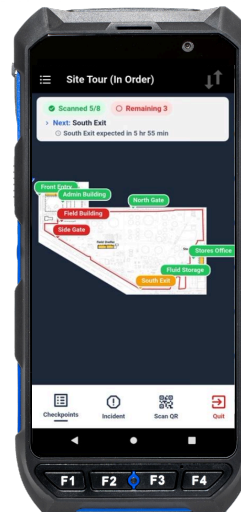

All-in-One Security Guard Device

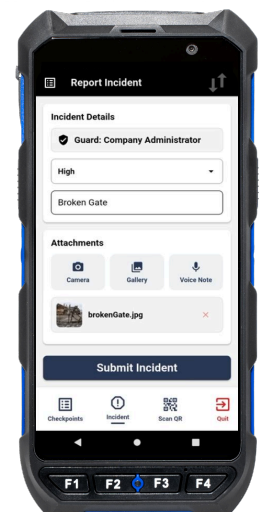

Combine mobile spot checks and guard touring on a single device.

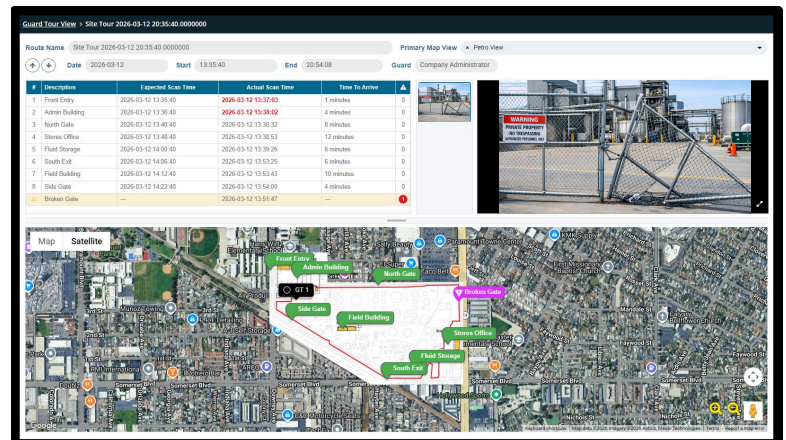

Active Guard Tour
